

# Gingerbread Cottage

Winster

Some 200 years old, Gingerbread Cottage is believed to have originally been the local cobblers house and workshop.

Situated in the picturesque Peak District village of Winster, Gingerbread Cottage is an idyllic Grade II listed detached stone cottage. The cottage offers accommodation for up to 4 people in a tranquil yet central village location, with the local pub, shop and post office less than a minutes stroll away.

The cottage has recently undergone a sympathetic renovation and refurbishment and is now presented with quality fixtures, fittings and furnishings whilst still retaining all the charm of a Grade II listed period cottage

On the ground floor there is a comfortable lounge which has exposed oak beams, sofa and armchair, TV/DVD, stereo and a selection of books, magazines and games.

The Kitchen/Dining room has exposed oak beams and a traditional stone fireplace. The recently refurbished kitchen area is well equipped with electric hob, electric built under oven and grill, belfast sink, fridge, microwave oven, kettle, toaster and seating/dining space for four.

On the first floor there is one double bedroom, one twin bedroom and a bathroom. The twin bedroom has partially exposed oak beams, two single beds and a chest of draws. The double bedroom has a traditional stone fireplace, a double bed, wardrobe and chest of drawers.

**Winster** is a picturesque former lead mining village located in the Peak District National Park. It was once the centre of the local lead mining industry and today still retains the feel of a lead mining centre, with rows of old miners cottages clinging to the hill side.
